

Usage

Notes are presented in two columns: main notes on the left, and sidenotes on the right. Main notes will have a larger margin. The following is the color code for the notes:

Blue	Definitions
Red	Important points
Yellow	Points to watch out for / comment for incompleteness
Green	External definitions, theorems, etc.
Light Blue	Regular highlighting
Brown	Secondary highlighting
Highlighted Green	Usually used in cases in proofs
Highlighted Magenta	Also used for cases in proofs; secondary highlighting
Highlighted Light Blue	Tertiary highlighting
Highlighted Brown	Quaternary highlighting

Table 1: Text color coding

The following is the color code for boxes, that begin and end with a line of the same color:

Blue	Definitions
Red	Warning
Yellow	Notes, remarks, etc.
Brown	Proofs
Magenta	Theorems, Propositions, Lemmas, etc.

Table 2: Environment color coding

Hyperlinks are underlined in magenta. If your PDF reader supports it, you can follow the links to either be redirected to an external website, or a theorem, definition, etc., in the same document. Note that this is only reliable if you have the full set of notes as a single document, which you can find on:

https://japorized.github.io/Tex_notes or
<https://tex.japorized.ink>
